Serco Europe is part of Serco Group, a leading provider of public services to governments, employing over 50,000 people across four main geographies working in defence, transport, justice, immigration, healthcare and citizen services.

In Europe we deliver services on behalf of a range of public sector bodies including the European Institutions, national Ministries of Defence, the European Space Agency (ESA) and the European Organization for Nuclear Research (CERN), focusing on three key sectors: Space, Defence, and International Organisations. Serco Europe operates across nine countries, including Belgium, Czech Republic, France and French Guyana, Germany, Italy, Luxembourg, the Netherlands, Spain and Switzerland. With over 40 years' experience in supporting the space sector, we work closely with our customers to deliver custom-made and specialised services, providing technical, scientific and management skills in support of the full range of European cornerstone space missions.

Serco Europe has operated in Italy for the past 30 years focusing on Space as our core business and providing highly specialised services in support of ESA, the Italian Space Agency (ASI), the German Aerospace Center (DLR) and the European Environmental Agency (EEA).

The Red Lab is Serco's new Research & Development incubator located in the Serco Italia premises, focusing on research and innovation in the space sector and providing unique research opportunities for space students and young scientists in the field of Earth Observation.
